

## ≡ Notice anything wrong?

There are many moving parts when it comes to creating a high-quality online course. And since I am doing that alone, there might be some little mistakes left here and there.

**If you notice an error/mistake** somewhere in the course (e.g. a spelling mistake, missing slides, error in the code, something else), **please let me know in the comments of that particular lesson** (or in the comments below). I will fix it as soon as possible.

Thanks for your help!
